

Wednesday 18/03/2020

Dear WCS Families,

As the progress of the COVID-19 Coronavirus happens around us you may hear many things within the Wellington community. It is likely, as has already happened, that there will be people within the Central West who will seek medical advice in regard whether they should be tested for the virus. We will hear about some of these via the grapevine, no doubt. It's part of living in a close and caring community.

At this point in time there are no confirmed cases with connection to WCS.

I have sought specific advice regarding the way that the correct information will be communicated to our school.

I am aware of the NSW Health guidelines regarding the way that relevant information about confirmed cases of COVID-19 Coronavirus will be shared with us.

If there is a confirmed case of COVID-19 with connection to our school community the NSW Department of Health will contact me directly, immediately after a positive result. This enables me to enact our response plan in a timely manner.

Please be assured that we remain vigilant in caring for your children, following the advice given to us by the appropriate authorities.

If you have any concerns or questions please email me at jo.blatch@wellingtoncs.com.au

Yours faithfully,

Jo Blatch

Principal.
